

Data Analytics Services

UnisLink delivers products and services by leveraging advanced data analytics.

UnisLink assists clients by designing and delivering customized analytics solutions to address specific management objectives. These solutions have been deployed to support hundreds of providers with their RCM and clinical challenges.

UnisLink is able to speed up the process of deploying solutions by utilizing a proprietary modular architecture. This approach also reduces the cost of developing and deploying analytics solutions, enabling users to gain actionable insights in a fraction of the time which would be required for traditional project based initiatives.

CARE GAP ANALYTICS

UnisLink uses care gap analytics to help healthcare organizations improve patient health outcomes, reduce the cost of care and navigate the unprecedented changes and pressures facing their industry.

REVENUE CYCLE ANALYTICS

UnisLink enables finance and operations leaders gain unparalleled insight into their RCM performance, going well beyond the standard reports available from PM systems.

POPULATION ANALYTICS

Clients gain a deeper understanding of their patients' behavior by analyzing demographic data, zip code analyses, likelihood of no-shows, propensity to pay and other similar factors.

PROVEN BENEFITS

- Speed up implementation
- Reduce costs
- Meet and beat quality score goals
- Reduce manual labor
- Optimize revenues
- Improve patient outcomes

Data Analytics Services to improve RCM performance while also improving clinical outcomes

ONC CERTIFIED HIT

UnisLink iCMS™ is certified by the ONC to track and report on all CQM measures for ambulatory and acute care providers. This enables providers to meet their quality goals while also improving care outcomes.

IMPROVING RCM PERFORMANCE

1. Increase Net Collections
2. Reduce Denials
3. Catch And Improve Coding Issues
4. Speed-Up Turnaround Times
5. Compare Reimbursements Against Contracts
6. Gain Insights For Contract Negotiations
7. Improve Forecast Accuracy

▶ **"UnisLink has been a tremendous asset to our group. We have improved care, reduced costs, increased revenues and reported better quality scores"**

- CEO, Large Medical Group

Ask us how we can assist your Organization deploy advanced analytics to improve RCM performance while also improving care outcomes.
